EXECUTIVE AGENCIES, OR PARTS THEREOF, WHICH WILL RECEIVE FIRST CONSIDERATION FOR LOCATION IN BUILDINGS WITH A 40,000 PERSONNEL CAPACITY TO BE CONSTRUCTED IN WASHINGTON DISPERSAL AREAS

Atomic Energy Commission:

Mainheadquarter office which administers the Atomic Energy Program. Number of positions involved..... 1,000

Department of Commerce:
Coast and Geodetic Survey:

This agency produces essential maps and charts..... 1,000

Defense Production Administration:
National Production Authority:

Present plans envision the dispersal of up to 75% of the activities of these offices. The location pattern would provide for central policy and programming functions and those of the industry divisions to be performed in central Washington. The processing operations related to controlled materials and allocation programs and a part of the defense production staff would be considered for dispersal. However, until those offices become fully organized and acquire the experience necessary to make the practical separation of operations, it is believed that the estimate for dispersed positions should be reduced to 50% of their expected strength by June 1952. Number of positions involved..... 3,500

Economic Stabilization Agency:

This agency is expected to have about 3,500 employees in the Washington area by June 1952. Present plans provide for the Economic Stabilizer and his staff to be centrally located and the price and wage control operations to be conducted at a dispersed location. Under this pattern about 3,000 positions would be involved..... 3,000

Federal Civil Defense Administration:

This Administration provides central planning and coordination of the civilian defense efforts of the Nation. In an emergency the Administrator, at the direction of the President, is authorized to coordinate and direct relief activities of the departments and agencies (after due consideration of military requirements of the Department of Defense) of the Federal Government. At present time organization and program plans are not sufficiently firm to estimate accurately the number of employees required for the headquarters staff. It is believed however provision should be made for at least..... 600

Department of the Interior
Bureau of Mines:

The Fuels and Explosives and the Foreign Minerals Divisions. These are technical divisions which provide basic data for defense activities..... 300

Geological Survey:

The Water Resources, Topographic, Geologic and Conservation Divisions. These are technical and operating divisions essential to defense activities..... 1,400

Department of State:

About 50% of the authorized positions of the Department in Washington. Includes functions of high priority such as the geographic bureaus and intelligence divisions. Activities of the Department now conducted in 24 buildings, some of which are of temporary construction. Estimated number of positions involved..... 3,500

Treasury Department:
Bureau of Public Debt:

These parts of the Divisions of (a) Loans and Currency and (b) Public Debt Accounts and Audit, which maintain the basic records incident to the receipt, custody, and issuance of new securities, the transactions in outstanding debt, and administrative control accounts over all security transactions.. 1,000
